I had no idea where to start and Best Furniture Tips became an invaluable guide. It enabled me to understand various styles,furniture terminology, what to look for in a piece of furniture and information on how to negotiate prices.I especially liked the advice and insights from some of the nation's top designers. Since I travel frequently the book was easy to take along and enabled me to check out design centers and stores in other cities in my spare time.Litwin has a pleasant writing style that explains in easy to understand English all the furniture jargon and pricing structures which many times seem overwhelming to a buyer. I would recommend this book to anyone who is contemplating a furniture purchase. Armed with this, one can confidently enter any store and not feel like a babe in the woods.One suggestion, buy her previous book, Furniture Hot Spots to find out where the really good stuff is.
