Marcus Nicholls : Realistic Armor Finishing Techniques (Expert Model Craft) before purchasing it in order to gage whether or not it would be worth my time, and all praised Realistic Armor Finishing Techniques (Expert Model Craft):

I would class myself as a returning modeller sitting somewhere between novice and intermediate level. This DVD showed me numerous tips on all those techniques I read about but prefer to have a visual base to learn from. You can rewind and go over it as many times as you wish which is an added bonus. Mr Nicholl has an impressive resume for this subject and he imparts his knowledge in a simple and logical manner. Just what you need to convert yourself from 'wannabe' to 'wow'! If you're at the level I'm at this is well worth your money. You will learn something.0 of 0 people found the

"I highly recommend this DVD to all you modelers who think you know all the tricks and to all those who wish they knew they tricks of producing an outstanding model." (AMPS) As the featured modeler in the Master Class Model Building Videos series, I have learned a thing or two about producing modeling videos in the last few years. So, it is with some degree of authority, that I can state that "Realistic Armor Finishing Techniques" is an excellent addition to the available library of how-to modeling DVDs...a tremendous product ... something here for almost any modeler of military hardware (IPMS)
