**Werner Muller : The Heavy Flak Guns, 1933-1945: 88Mm, 105Mm, 128Mm, 150Mm, and Ballistic Directional Equipment** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Heavy Flak Guns, 1933-1945: 88Mm, 105Mm, 128Mm, 150Mm, and Ballistic Directional Equipment:

0 of 0 people found the following review helpful. details By Jim Carone--Capt.HB--no dj///142 glossy pages///297 BW photos///49 scale drawings///1 chart///also covers the heavy guns on railway cars and my favorite-the twin 128mm guns in the flak towers. Its one of the best flak photo books in my library., hope this helps., cap 0 of 0 people found the following review helpful. revealing that the enemy were intelligent, resourceful By K Cameron Having seen the 128s at

the Aberdeen (MD) Tank Museum, I had always wanted to know more. Also, gradually more and more has been told about the flexibility and effectiveness of German air defense in WW II. This is the nature of war commentary; the first books into print are mostly saying hurrah for our side, our airplanes, our courageous servicemen. Then gradually over the decades fuller information is presented, revealing that the enemy were intelligent, resourceful, able persons, whatever the politics of their governments. 0 of 0 people found the following review helpful. Probably the best Heavy Flak Reference used by Nazi Germany. By Crash jr Probably the best reference work on all the heavy Flak artillery of Germany during WWII. There are books that are more complete for the 88 but this is the best work for the 105mm, the 128mm, and the proposed 150mm. Photos and data are excellent. Nicely bound volume.

Superb study of the 88, 105, 128 and 150mm guns.
