Roy Marcot : The History of Remington Firearms: The History of One of the World's Most Famous Gun Makers before purchasing it in order to gauge whether or not it would be worth my time, and all praised The History of Remington Firearms: The History of One of the World's Most Famous Gun Makers:

9 of 9 people found the following review helpful. Not quite what you need, but a good read, once By Customer I had just bought an original USMC 40X and wanted to get the history of the model. I was lead to believe that this was the best book on Remingtons, the 40X in particular. OK, pictures are fairly high quality, except that the rifles go across

two pages and you lose a large chunk of the picture in the crease. The history is interesting and generally carries on thru each model "covered." Yep, "covered." I was interested in 3 models: 40X, 541-T, and the 504. The history on the 40X was OK. There was no mention of the other two. To make things worse, the index is awful. There are a couple of model numbers listed, and I mean a couple. A rifle as significant as the 40X is not listed. Even the 700 does not get listed. If you can get this book cheap then go for it. Its worth say \$10 or less.0 of 0 people found the following review helpful. Roy Marcot tells all about Remington FirearmsBy M R NesbittVery good, this is a book I'll return to over and over while researching individual guns by Remington. Right now I'm mostly interested in the #1 Rolling blocks and there is a lot of info on individual military orders in addition to the #1 Sporting Rifles.0 of 0 people found the following review helpful. Five StarsBy Alan J MichaletOn time and for a good price.

A fully illustrated history of one of America's finest and most innovative company.

From the Back CoverA detailed and beautifully illustrated book that tells the full story of Remington Firearms model by model with more than 200 clear photographs. Separate sections cover all the company's output, including Pistols and Revolvers, Rifles and Carbines, and Shotguns. The range of firearms discussed spans everything from Rider's diminutive parlor pistol, which relied on a percussion cap to propel its diminutive .17 projectile, to the might .30 caliber Browning Machine Gun of 1917 which had a firepower capability of 600 rounds per minute.Many interesting historical pictures and company posters complete the story.
