Marcel Van Cleemput : The New Great Book of Corgi 1956-2010 before purchasing it in order to gauge whether or not it would be worth my time, and all praised The New Great Book of Corgi 1956-2010:

The book should have mostly consisted of totally new content, a large majority of the 490 odd pages should have been dedicated to all models and product from 1984 on. It did not need to be a pictorial extravaganza obviously because of space, but at least for each year and month a model name and number of every model would have been nice. The section 1984 and beyond seemed rushed and very amateurish, a complete contrast to the original Great book of Corgi. Because the book took so long to be produced I was expecting something as good if not better than the original. Most of the book is just a rehash of what owners of the original Great book of Corgi already have. Saying that, most did know already that content from 1956 to 1984 would be included in the book. The book that has been produced is the complete opposite to what the reader should have received, where most of the space should have been dedicated to the latter period. I was looking forward to comparing what I did and did not have to the book but now this is not possible. Very disappointed the book will now just sit on the book shelf. 1 of 1 people
