6 of 6 people found the following review helpful. tons of pictures with prices (thats what we all really want)By shyodeenJust buy it. It is over 1000 pages of detailed well organized information. The thousands of photos are high quality. Most book companies would have sold this as a series of 5 or 6 hardcovers at 29.00 each. I know I would have. Most collectors, dealers, scholars would have gladly paid 80 dollars for whats inside without even hesitating. Actually this would make a perfect coffee table book because you can pick it up and "JUST LOOK AT IT." (as Ed Bassmasters charecter Skippy would say) It trully is a work of art just like the pieces within. If you can only buy one book make it this one. There are nice collection and museum pictures. The prices like any price guide are only applicple if you were in a dream deal scenario with a collector who was a billionaire. Someone I worked with saw this at the bookstore and told me about it having over a thousand pages with pictures and I was sold.13 of 13 people found the following review helpful. Loved it!By David E. StraubThis book is considered by many collectors to be the "bible", for identifying artifacts. I reference this source almost daily. In addition to artifact id use, this series of books contain many interesting articles on Sites and goings on in the archaeological world. I would highly recommend this book to anyone interest in Indian artifacts - even if you are not a collector.3 of 3 people found the following review helpful. full of very good photos of arrowheads other Indian artifacts from all ...By Susan Juanita SmithThe book is very informative, it is 2" thick, 1380 pages b/w color pages, full of very good photos of arrowheads other Indian artifacts from all over the US. Has very informative data measurements on all items....It is now my best reference book on Indian arrowheads. Just wish it were hardback or spiral..
