Art Dreves, self taught archaeologist, advised our museum on display of aboriginal dugouts and donated arrowheads to the Timucua display in our museum. It was Art who recommended Overstreet Indian Arrowheads as an excellent resource for guests who wish to delve further into arrowhead identification. We have been quite pleased with its informational text and illustrations.

By R.Culter
I have been collecting Native American arrowheads since I was a child (I am now 65) and for the first time I can actually identify what I have. This is a great book for identifying arrowheads by type, location and value. A must for any serious arrowhead collector.

Life-long collector and arrowhead expert Robert Overstreet assembled a team of consultants from around the country to produce the most complete guide available to these genuine prehistoric artifacts. Newly reformatted, the fifth edition now includes detailed information organized by geographical region for quick and easy identification. 5,000+ life-size illustrations. 16-page color insert.
